BRENDAN DUFFY

SOFTWARE DEVELOPER

ABOUT ME

How many people can say they worked on a Windows server in the middle of the winter in ANTARCTICA??!! Check out the Observation Hill webcam from McMurdo Station. If you give me an interview I will tell you which building I lived in and anything else you would like to know about living on "THE ICE."

```
const aboutMe = {
    family: 'wife, daughter and dog',
    music: [play piano', 'play guitar', 'singing', 'listening to all genres'],
    work: [
    'its not work because I love coding',
    `don't be a jerk, live by the GOLDEN RULE`,
    'always learning, especially from others',
     'write clean code'
     ],
    food: 'too much data to list here, would need to create a large database',
    favoriteMovieScene: `Weird Al Yankovich's UHF's Wheel of Fish.  Just kidding but I did buy the movie for $5 on
     Apple TV recently.  I couldn't resist such an amazing price for such an 80's classic.`
  }
```
